

Satellite Radio is the best thing that has ever happened to Radio! I've heard negative advertising on local stations and they embellish issues associated with satellite radio. I do not want the corporate radio folks to limit my choices, if they provided more choices people will listen to their products, instead they want to limit competition. This is against some of the freedoms we enjoy as Americans! Let the market decide on which is better! Please do not limit the choices we have just because of greed. THANKS FOR THE ABILITY TO COMMENT ON THIS ISSUE!

Charlie Woolford

A happy satellite radio customer who pays for radio because the other choices are so poor!
